## Introduction

Before you begin please take time to read through this introduction and instructions to familiarise yourself with the product and to also help you select the best way to attach your Soundbar. This instruction manual covers many different configurations and is very comprehensive. Please do not be put off by this as you will only need to follow a few steps.

This introduction gives you a basic idea as to what steps are involved in mounting your Soundbar to your TV.

### Measure your TV and Soundbar fixing holes

### Prepare the Soundbar Mount Bracket

## Mounting Above or Below?

Before you start to mount your Soundbar to your TV you will need to decide if you are going to mount your Soundbar above your TV or below your TV

### Mounting Above Follow steps 3 to 8

### Mounting Below Please go to step 9

You will then need to attach the Soundbar to your TV. See below for a description of the different fixing methods available.

### Screwing to the Back of the Soundbar

Use this method if you have no clashes with the TV and Soundbar fixing holes.

### Screwing to the Bottom of the Soundbar

Use this method if you have no clashes with the TV and Soundbar fixing holes.

### Attaching the Soundbar with Hook and Loop

Use this method if your Soundbar has no fixing holes or if there are clashes.

### Attaching the Soundbar with Manufacturers Bracket

Use this method if a Bracket is supplied by the Manufacturer. You will also find more information in the Manufacturers instructions.

### Attaching the Soundbar with Keyhole Pin

Use this method if your Soundbar has Keyhole fixing holes.

# 1 Measure your TV and Soundbar fixing holes

Measure the width of the fixing holes on the back of your TV (**X1**) and the back or bottom of your Soundbar (**X2**) or the length of your Soundbar (**X3**) if it has no fixing holes.

If your TV fixing holes and Soundbar fixing holes are equal you will not be able to screw directly to the back or bottom of your Soundbar. In this case you will need to use a different method for attaching.

Before you attach horizontal bracket **B** to vertical bracket **A** use measurements **X1** and **X2** or **X1** and **X3** to decide the best configuration. Please see below for examples.

Examples below show soundbar with fixing holes

Example shows soundbar with no fixing holes

## 2 Prepare the Soundbar Mount Bracket

Use measurements **X1** & **X2** or **X3** from Step 1

**H** x2

## Mounting Above or Below?

Before you start to mount your Soundbar to your TV you will need to decide if you are going to mount your Soundbar above your TV or below your TV

### Mounting Above

Follow steps 3 to 8

### Mounting Below

Please go to step 9

# Mounting Above

You only need to follow one of steps 3 to 7 if you have chosen to have your Soundbar mounted above your TV.
