2 Tools Recommended

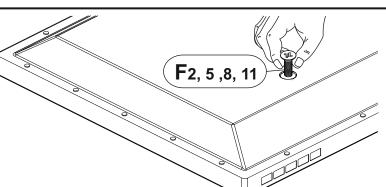

Ø10mm (25/64") Masonry

Ø3mm (1/8") Wood

3 Determine Correct TV Screw Size

Choose from the TV Fixings selection. You need to determine which diameter of screw fits your TV.

To determine the correct screw diameter, try screwing (F_2), (F_5), (F_8) & (F_{11}) into one of the fixing holes on the back of the screen until you find the one that fits.

4 Fit Screen Hangers To TV

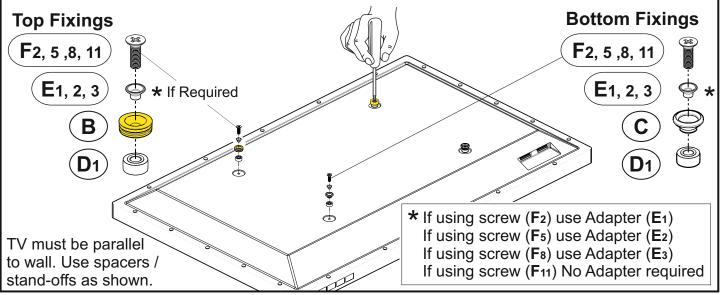

Once you have established which screws you need for your TV, you can attach the Hangers (**B**) and Stand-offs (**C**) to the back of your TV.

Typical recommended example shown is for fixings with the TV spaced 20mm from the wall. The TV Mount can position your TV between 12mm and 40mm from the wall. For alternative configurations see section 11.

You might need to use spacers to increase the clearance of your TV from the wall in order to avoid cables coming out of your TV and improve access and ventilation to the back of your TV (spacers (**D1**) allow you to have a gap of 20mm or 40mm, see section 11).

In certain circumstances it may be necessary to use red spacer (**D2**) as either a replacement or addition to spacer (**D1**), for more information please see section 11.

If your TV fixing centres don't fit, STOP installation and contact the customer services helpline.

5 Assemble Positioning Template

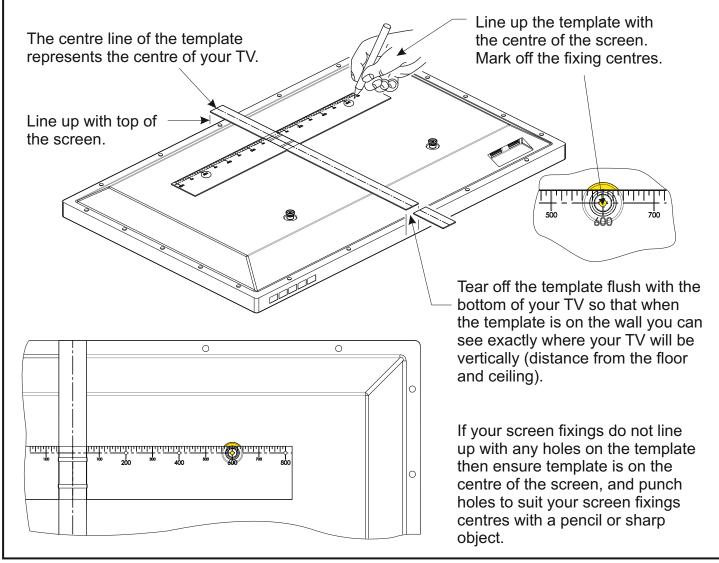

The horizontal part of the positioning template is used to mark out where you need to drill the mounting holes on your wall. The vertical part is just a guide to allow you to see how high up the wall your TV will be to help you find the perfect position for viewing your screen. Thread template (P_2) through template (P_1) as shown.

6 Determine Bracket Hole Centres

P1

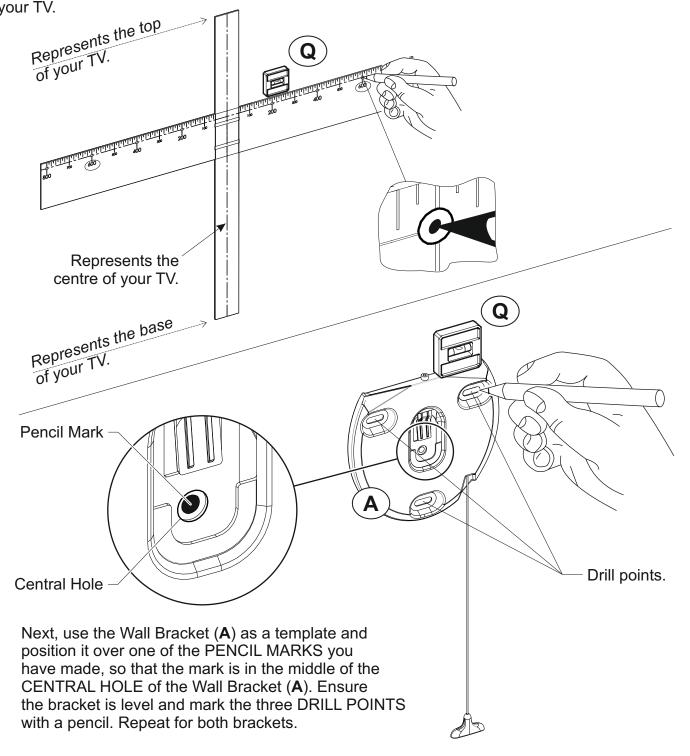

P₂

Lay the template on the back of the TV and follow the instructions below.

7 Marking Wall For Drill Points

Use your template to mark two points on the wall that correspond with the top fixing centres of your TV.

8 Planning & Preparation

Determine the wall type that you have (i.e. Solid Wall / Dot & Dab / Plasterboard/Sheetrock / Wood Stud / Metal Stud) and select the appropriate fixings (See Section 9). Ensure the drilling area is free from mains services (Gas / Electric / Water).
