## Assembly Overview

### Fit Screen Hangers to TV

### Fitting the Wall Bracket

### Hanging the TV

Retain all packaging in case the bracket needs to be returned.

Contents may vary from photography/ Illustrations.

You will not need all these parts, so expect there to be some left over depending upon the specification of your TV.

This product is intended for indoor use only. Use of this product outdoors could lead to failure and personal injury.

It is the responsibility of the installer to ensure that the mounting wall is of a suitable standard and void of any services (eg gas, electricity, water etc).

AVF accept no responsibility for any damage or loss caused by installing this product in a sub standard wall.

Take Care

# 1 Measure the TV fixing holes Width and Height

**Flat** (X) 200mm to infinity

**Tilt** (X) 200mm to infinity

**Flat** (Y) 100mm to infinity

**Tilt** (Y) 100mm to 400mm

If width (X) is less than 200mm or height (Y) is less than 100mm  
STOP installation now and contact the customer help line

You are provided with 4 diameters of TV fixing screws, **M4**, **M5**, **M6** and **M8**. Determine the screw diameter that fits and remember for step 2 or 12.

**M4 = G1-G3**

**M5 = G4-G6**

**M6 = G7-G9**

**M8 = G10-G12**

After completing step 1 you will have TV fixing screws left over,  
please keep for future reference

## Flat to Wall or Tilt Position

Before you start please choose if you would like your TV to be either Flat to Wall or in a Tilt Position.

**Flat to Wall**  
Follow steps 2 - 8

**Tilt Position**  
Follow steps 9 - 16

## 2 Fit Screen Hangers to TV

**Flat to Wall only**

Once you have established which screw diameter you need for your TV you will need to choose which wall spacing you require. Check the back of your TV and use the **OPTION** that fits your TV. Please see page opposite for more details.

### OPTION 1

12mm Wall Space

Suitable for TVs with a flat back and no obstructions

### OPTION 2

20mm Wall Space

Suitable for TVs with small to medium obstructions eg power supply, mouldings etc

### OPTION 3

40mm Wall Space

Suitable for TVs with large obstructions eg power supply, mouldings etc

### Top Fixings

### Bottom Fixings

In certain circumstances it may be necessary to use red spacer **E2** as either a replacement or addition to spacer **E1**.

When is it necessary to use red spacers **E2**?

It is recommended that when fitting Hangers **C** and Stand-offs **D** to your TV you have at least 5-10mm of screw engagement. In certain circumstances you may need to use red spacers **E2** as either a replacement, or together with spacers **E1** to achieve this. Whenever you use red spacers **E2** you must use all 4 provided.

**Problem**  
Not enough screw engagement

**Solution**  
Red spacer **E2** has replaced spacer **E1**

**OPTION 1**  
12mm Wall Space

**3****Assemble Positioning Template****Flat to Wall only****4****Determine Bracket Hole Centres****Flat to Wall only**

Lay the template on the back of the TV and follow the instructions below.

\* If hangers **C** do not line up with any holes on the template then ensure template is firmly in position and punch 2 holes to match your top fixing centres with a pencil or sharp object.

## 5 Marking Wall For Drill Points

Flat to Wall only

Before marking the wall, determine the wall type that you have (i.e. Solid Wall/ Dot & Dab/ Plasterboard/ Wood Stud/Metal Stud). Ensure the drilling area is free from mains services (Gas/Electric/Water).

Next, use the Wall Brackets **A** and **B** as a template and position them over the appropriate **PENCIL MARKS** you have made, so that the mark is in the middle of the **CENTRAL HOLE** of the Wall Bracket. Ensure the bracket is level and mark the three **DRILL POINTS** with a pencil. Repeat for other bracket. Drill six 3mm pilot holes and select appropriate fixings (see section 6)

# 6 Fitting the Wall Bracket

**Flat to Wall only**

Use the correct fixings for your wall type. Mixing fixing screws may be required for installations that span different wall types. **DO NOT OVER TIGHTEN SCREWS.**

## Solid Wall

## Drywall

Min supporting surface specification:- 1/2" thick drywall, mounted on 1 1/2" x 3 1/2" wood stud at 16" centers.

## Wood Stud

Min supporting surface specification:-  
1/2" thick drywall

Ensure hole is  
in the middle of  
the wood stud

Use Drywall Fixing **H**

Self  
drilling

Lubricate screw  
thread with soap

Only one fixing will be in the wood stud. The  
other fixings will be in drywall (see above)

## Metal Stud

Min supporting surface specification:-  
1/2" thick drywall

3.5mm  
(9/64")

0.6mm (0.025") MIN stud thickness

Use Drywall Fixing **H**

Self  
drilling

Only one fixing will be in the metal stud. The  
other fixings will be in drywall (see above)

## 7 Fitting the Wall Bracket Covers

Flat to Wall only

On wall bracket covers **A1** & **B1** are 3 retaining tabs. These locate onto 3 retaining lips on wall brackets **A** & **B** and lock the wall bracket covers in position.

## 8 Hanging the TV

**Flat to Wall only**

### Hanging the TV is a two person job.

Present hangers **C** (on the back of the TV) to the opening on brackets **A** & **B**. Slide down and across into place. Ensure both hangers are fully engaged. If cables from the TV prevent the TV resting against the wall then an alternative hanger configuration will be required (see section 2).

TV must be parallel to wall. Use spacers / stand-offs as shown in section 2.

### Removing the TV

This is a two person job. To remove the TV reverse the movements as shown above.

## 9 Choose Tilt

## Tilt Position only

You can choose between 2 different tilt positions, either 4° or 8°.

### 4° tilt

### 8° tilt

Ensure a flush fit between tilt bracket **W** and spacer **X** by lining up the notch and pip correctly

If you have chosen 8° tilt option and your TV size is 65" or over it will be necessary to add spacers to prevent your TV clashing with the wall, the size of your TV will determine if you need to use 1 or 3 spacers. Please see below for an example.

Spacers **E1** are used between tilt bracket **W** and TV to prevent clash with wall

## 10 Assemble Positioning Template

Tilt Position only

## 11 Determine Bracket Hole Centres

Tilt Position only

Lay the template on the back of the TV and follow the instructions below.

\* If top TV fixing holes do not line up with any holes on the template then ensure template is firmly in position and punch 2 holes to match your top fixing centres with a pencil or sharp object.

# 12 Fit Tilt Brackets to TV

**Tilt Position only**

Once you have established which screw diameter you need for your TV you will need to choose which wall spacing you require. Check the back of your TV and use the **OPTION** that fits your TV. Please see page opposite for more details.

## OPTION 1

12mm Wall Space

Suitable for TVs with a flat back and no obstructions

## OPTION 2

20mm Wall Space

Suitable for TVs with small to medium obstructions eg power supply, mouldings etc

## OPTION 3

40mm Wall Space

Suitable for TVs with large obstructions eg power supply, mouldings etc

In certain circumstances it may be necessary to use red spacer **E2** as either a replacement or addition to spacer **E1**.

When is it necessary to use red spacers **E2**?

It is recommended that when fitting Tilt Brackets **W** to your TV you have at least 5-10mm of screw engagement. In certain circumstances you may need to use red spacers **E2** as either a replacement, or together with spacers **E1** to achieve this. Whenever you use red spacers **E2** you must use all 4 provided.

### Problem

Not enough screw engagement

### Solution

Red spacer **E2** has replaced spacer **E1**

# 13 Marking Wall For Drill Points

**Tilt Position only**

Use the marks on the top row that you made in step 11 and make the same marks on the bottom row. You will use the marks on the bottom row to make 2 pencil marks on the wall.

Before marking the wall, determine the wall type that you have (i.e. Solid Wall/Dot & Dab/ Plasterboard/Wood Stud/Metal Stud). Ensure the drilling area is free from mains services (Gas/Electric/Water).

Next, use the Wall Brackets **A** and **B** as a template and position them over the appropriate **PENCIL MARKS** you have made, so that the mark is in the middle of the **CENTRAL HOLE** of the Wall Bracket. Ensure the bracket is level and mark the three **DRILL POINTS** with a pencil. Repeat for other bracket.

Drill six 3mm pilot holes and select appropriate fixings (see section 14)

# 14 Fitting the Wall Bracket

**Tilt Position only**

Use the correct fixings for your wall type. Mixing fixing screws may be required for installations that span different wall types. **DO NOT OVER TIGHTEN SCREWS.**

## Solid Wall

## Drywall

Min supporting surface specification:- 1/2" thick drywall, mounted on 1 1/2" x 3 1/2" wood stud at 16" centers.

## Wood Stud

Min supporting surface specification:-  
1/2" thick drywall

Ensure hole is  
in the middle of  
the wood stud

Use Drywall Fixing **H**

Self  
drilling

Lubricate screw  
thread with soap

Only one fixing will be in the wood stud. The  
other fixings will be in drywall (see above)

## Metal Stud

Min supporting surface specification:-  
1/2" thick drywall

3.5mm  
(9/64")

0.6mm (0.025") MIN stud thickness

Use Drywall Fixing **H**

Self  
drilling

Only one fixing will be in the metal stud. The  
other fixings will be in drywall (see above)

# 15 Fitting the Wall Bracket Covers

Tilt Position only

On wall bracket covers **A1** & **B1** are 3 retaining tabs. These locate onto 3 retaining lips on wall brackets **A** & **B** and lock the wall bracket covers in position.

# 16 Hanging the TV

**Tilt Position only**

## Hanging the TV is a two person job.

Present hangers **C** (on the back of the TV) to the opening on brackets **A** & **B**. Slide down and across into place. Ensure both hangers are fully engaged. If cables from the TV prevent the TV resting against the wall then an alternative hanger configuration will be required (see section 12).

Use spacers / stand-offs as shown in section 12.

If required you can adjust the level of your TV by moving from side to side

## Removing the TV

This is a two person job. To remove the TV reverse the movements as shown above.

## Removing the Wall Bracket Covers

Should you want to remove the wall bracket covers please follow the steps below.
