DO NOT remove until step 2

## Assembly Overview

Fit the TV Mounting Plate

Fit the Wall Bracket

Determine your TV position

Suitable Wall Types

Solid Wall

Wood Stud

## Index

1 Measure the TV fixing holes Width and Height
2 Preparing the TV Mounting Plate
3 Fitting the TV Mounting Plate
4 Determine your TV position

## 5 Marking Wall for Drill Points

6 Fitting the Wall Bracket
7 Fitting the Wall Bracket Covers
8 connecting the TV
9 Cable management

Retain all packaging in case the bracket needs to be returned.
Contents may vary from photography/ Illustrations.
You will not need all these parts, so expect there to be some left over depending upon the specification of your TV.
This product is intended for indoor use only. Use of this product outdoors could lead to failure and personal injury.
It is the responsibility of the installer to ensure that the mounting wall is of a suitable standard and void of any services (eg gas, electricity, water etc).
AVF accept no responsibility for any damage or loss caused by installing this product in a sub standard wall.

(Y) $75-400 \mathrm{~mm}^{*}$

If width X is greater than 600 mm or height Y greater than 400 mm STOP installation now and contact the customer help line

You are provided with 4 diameters of TV fixing screws, M4, M5, M6 and M8. Determine the screw diameter that fits and remember for step 3 .

After completing step 3 you will have fittings left over, please keep for future reference.

Before you can attach the TV mounting plate to your TV you need to remove the plate from your wall mount.

Remove the Level Lock Screw and Washers and safely keep for step 8.
(ii) Remove the TV Mounting Plate.

Use the option that fits your TV

If in any doubt please call the customer help line

## OPTION 1

If your TV fixing holes match any of the sizes shown above you will not need to use any adaptors. Please go to step 3.

When attaching adaptors B you must always use HOLES x4 and either of the SLOTS.

Example shown is $400 \times 400$ fixings

Adaptors B can be fixed in different positions in the slots on the plate to match your TV fixing holes.
(X) $75 \mathrm{~mm}-600 \mathrm{~mm}$

Below are some common examples of how the adaptors can be positioned to match the fixing holes on your TV.

For TVs with flat / unobstructed back.

WARNING

If your TV has an irregular/obstructed back or if you have any issues fitting to the back of your TV with the supplied screws, please call the customer services helpline.

Before you fully tighten the TV mounting plate please check that the mounting plate holes line up with the fixing holes on the back of your TV.

Attach the bracket to the back of your TV using suitable screw, reducer and spacer

For this step you will need your Wall Drilling Template WT.

Before marking any drill points you will need to determine the wall type that you have, either Solid Wall or Wood Stud Wall. Ensure the drilling area is free from mains services (Gas / Electric / Water). If fixing to a solid wall it is recommended that you place the drilling template so that the Wall Bracket Centre line is where you want the centre of your TV to be. If you need to avoid services embedded in the wall then you may need to laterally shift the arms on the wall bracket a small amount. See Lateral Shift Option.
If fixing to a wood stud wall you must place the drilling template so that the drilling holes are over two wood studs. If you want the centre of your TV in a different position to the Wall Bracket Centre Line you can laterally shift the arms on the wall bracket to ensure your TV is in the desired position. See Lateral Shift Option.

(i)Decide where you want your TV to go on the wall. Measure from the floor to the bottom of where your TV will be. Make a note of this distance in box di on your drilling template.

Measure from the top of the TV mounting plate to the bottom of your TV. Make a note of this distance in box d2 on your drilling template. Add d1 and d2 together and put the result in box d3 on your drilling template.

To ensure your TV is at the desired height place the drilling template on the wall so that the Height Measurement line is $\mathbf{d} 3$ above the floor.

## Lateral Shift (Optional)

i
It is highly recommended that any lateral shift adjustment is done before installing the bracket on the wall.

The position you have chosen for your TV might not be central between the wood studs, or you may have to avoid services in the wall. In this case you can laterally shift the arms of the bracket so the TV is exactly where you want it.

## Example of Lateral Shift

Centre of wood stud

Desired TV centre line

(ii) Move top bracket across $\mathbf{x}$

(iii) DO NOT overtighten

(iv) Repeat steps i to iii for the bottom bracket.

## Wood Stud

Use the slot that is over the center of your wood stud.

## Solid Wall

Use the six slots shown.

8 Connecting the TV

Ensure cables don't restrict arm movement

Check all fittings are tight

TV Levelling (optional)

Loosen the Level Lock Screw, adjust your TV until it is level, then re-tighten the screw.
