Tools

Construction will require a standard cross head screwdriver not included.

 Take extra care not to over tighten any screws as this may cause damage.

 Make sure the arrows on all part B are aiming towards the panel edge when inserted.

 Make sure not to over tighten any part A as this could cause damage or error in alignment of panels.

1

2

NOTE: If Part H doesn't fit easily by pressing it in with a thumb, a small hammer could be used to tap into position.

3

4

(A) x2

7

NOTE: Make sure the glass shelf is secured on the rubber suction cups.

(C) x6

5

NOTE: Make sure to insert all 4 part Bs and tighten to secure the panels in place (2 part Bs should be fitted to the underside not visible in this image.)
